Proposed - For Discussion On

1.(Twice amended) A self-contained computerized variable intensity light bulb, comprising:

a plurality of light sources;

a power source connector having a standard light bulb base for connecting the computerized variable intensity light bulb to a standard light bulb socket as a power source; and

a computerized light control connected to, and integrated with, said power source connector for receiving power and connected to said plurality of light sources for providing power to said light sources without using a filter[, a phase-fired SCR, and without using a choke [and an amplifier];

wherein said light sources comprise at least one of compact fluorescent bulbs, self ballasted fluorescent bulbs, fluorescent bulbs, incandescent bulbs, arc tubes, metal halide bulbs, mercury bulbs, low pressure sodium bulbs, high pressure sodium bulbs, and luminescent panels [and light emitting diodes].

Remarks

Claim 1 incorporates claim 2.

Note that Recknagel requires LEDs.

Note that Sinha requires a choke (CHOKE in Figure 1B and column 5, line 46-50).

Note that Yamazaki requires a filter (filter 45 in Figure 3 and column 2, lines 47-49).
